

SKYGEN

SKYGEN continues to transform the dental industry with pioneering solutions like the Provider Select Suite to improve access to high-quality, appropriate dental care, increase member satisfaction and reduce healthcare costs.

The Provider Select Suite helps dental payers identify and recognize the high-performing providers within their programs. Members have a better experience when they are directed to providers who deliver the most appropriate and efficient care, and payers reduce fraud, waste and abuse. In addition, Provider Select aligns the interests of payers, providers, patients, employer groups and state partners in the common goal of providing high quality, appropriate and effective care at lower costs. Provider Selection solutions are available individually and as the SKYGEN Provider Select Suite:

PROTECT MEMBERS FROM INAPPROPRIATE DENTAL CARE, REDUCE COSTS AND IMPROVE MEMBER SATISFACTION WITH THE SKYGEN PROVIDER SELECT SUITE.

RATINGS TOOL:

USE RATINGS ALIGNED TO YOUR PROGRAM GOALS TO IDENTIFY HIGH-PERFORMING PROVIDERS AND REDUCE PROVIDER VARIANCES.

With the Ratings Tool, SKYGEN can use appropriate care, cost of care, electronic adoption and custom criteria to measure and rate provider performance. The Enterprise System's robust configuration allows weighting of these categories to align ratings with program goals. Variances that emerge make it possible to detect and prevent inappropriate care, and shift more members to efficient, quality care. SKYGEN provides steps for educating providers that wish to improve their rating.

RECOGNITION PROGRAM:

ALIGN PROVIDERS WITH YOUR GOALS FOR HIGH-QUALITY, COST-EFFECTIVE CARE BY RECOGNIZING AND REWARDING HIGH PERFORMERS.

With this Provider Select solution, SKYGEN helps payers build a tailored strategy to recognize and reward providers for delivering high-quality, cost effective care. Recognition programs may include find-a-provider referrals, recognition on the web as well as preferred provider status. Payers may also integrate a gain-sharing program or other value-based reimbursement.

ENHANCED FIND-A-PROVIDER:

OPTIMIZE YOUR USE OF PROVIDER RATINGS TO IMPROVE MEMBER SATISFACTION, INCREASE ACCESS TO QUALITY CARE AND REDUCE COSTS.

The Enhanced Find-A-Provider solution includes enhanced capabilities not found in traditional location-based find-a-provider tools. The solution uses proximity and provider ratings to direct members to nearby providers that offer the most appropriate and efficient dental care. You gain significant cost of care savings by shifting members to locations with the optimum blend of ratings and travel distance.

POTENTIAL ANNUAL COST OF CARE SAVINGS

To ensure a seamless member experience, Enhanced Find-A-Provider includes configurable travel tolerances by market so that travel is appropriate for specific geographic or metropolitan areas. Search results can be randomized to avoid overwhelming a particular location or locations.

Scenario #1

Move **3%**
of Patients

\$291,000 Savings
\$0.09 PMPM

Scenario #2

Move **5%**
of Patients

\$485,000 Savings
\$0.15 PMPM

Scenario #3

Move **10%**
of Patients

\$970,000 Savings
\$0.29 PMPM

(Hypothetical savings based on a state analysis of approximately xxx members and 750 general dentists, with 50% meeting minimum performance standards, 24% performing below performance standards, and 26% performing above performance standards.)
