# SKYGEN®

# PROVIDER DATA MANAGEMENT

### Revolutionizing Provider Data Accuracy, Efficiency & Integration

## VISION PROVIDERS WANT PAYERS TO INTEGRATE TECH TOOLS

**52%** want online patient portals

**51%** want automated billing/coding software

**34%** want online submission of prior authorizations

**30%** want immediate claims submission and processing

Source: 2025 SKYGEN Pulse Report

## FEATURES FOR A SMARTER PROVIDER EXPERIENCE

1. **Member-Specific Portal Experiences:** For each member, the portal's smart design shows providers only that member's information, coverage, and options relevant to the payer and plan, streamlining workflows and patient service.

2. **Automated Materials Ordering & Management:** Faster, flexible, and more efficient online ordering from preferred labs helps improve patient experiences.

3. **Automated, End-to-End Claims Management:** SKYGEN integrates claims processing with materials ordering, and enables real-time data flow for benefits eligibility verification, pre-claim estimate reports, authorizations management, and tracking of payments and remittances, improving provider satisfaction.

## SKYGEN'S UNIQUE ADVANTAGE: BEST-IN-CLASS DATA ORGANIZATION

### Structured » Highly Reliable » Best-in-Class

SKYGEN's unique data structuring methodology eliminates costly duplication of provider records. Unlike other solutions, SKYGEN organizes provider data using a combination of provider, location, payee, and tax entity records.

**Prevents redundant records**

**Reduces administrative overhead**

**Ensures data integrity across systems**

## BENEFITS FOR PAYERS

A single source of truth for provider data improves accuracy, efficiency, and provider satisfaction

| Immediate access to the most current data | Streamlined, secure integration with APIs | Efficiency improved, redundancies eliminated | Reduced operational friction and costs | Simplification creates provider satisfaction |
