

# SKYGEN'S DENTAL HUB

# CREDENTIALING SERVICE

## MAKING CREDENTIALING A BREEZE

The Dental Hub connects you with multiple payers on one platform, and then further streamlines the credentialing process by centralizing it from start to finish. Dental Hub Credentialing delivers a single, seamless, one-and-done process — giving you way less paperwork, faster approvals, and more time to focus on patients.

**Just a few things that make Dental Hub Credentialing so much better...**

### The Dental-Specific Application

- No medical questions
- It's about **10x** shorter than CAQH!
- You submit only one application – one time

### It's Lightning Fast – No More Back and Forth with Payers

- Pre-verification process avoids errors by checking critical data elements against primary sources even before you submit your application
- Automated processes quickly verify your information against primary sources
- The digital application ensures no information is missing

### You Get a Single, Common Recredentialing Date for All Payers

- The Dental Hub puts all payers on a common recredentialing cycle<sup>1</sup>
- That means you get a single recredentialing date for all your payers!
  - This can limit your work to recredential – with all your payers – to as little as taking a couple of minutes to retest to your application every three years!
  - No more endlessly sending multiple application packets back to multiple payers
  - This kinda, sort of eliminates the recredentialing process for you!

### Your Account is Flexible

- You can delegate the work to manage your credentialing information to others
- But because you have your own account, it stays with you wherever you go – there's no need to start from scratch when you start or join a new practice

<sup>1</sup>: Applications may require verification when Payers join the Dental Hub off-cycle. Those Payers are then added to the common recredentialing cycle.
